Recommendation Letter for Yacine Bouzerara

To whom it may concern,

I am pleased to recommend **Yacine Bouzerara**, who successfully completed his internship at **Apollo Green Solutions Hellas** as a Machine Learning Developer, within the Erasmus Framework from 15.09.2025 to 29.01.2026.

During his time with our team, Yacine demonstrated strong technical skills, professionalism, and a proactive attitude. He worked on ML tasks that supported the performance and scalability of our energy management platform.

He managed to complete our forecasting feature and volunteered to work on it voluntarily even after his internship had ended, to make sure he delivers a complete product.

Yacine quickly adapted to our development environment very quickly. He was comfortable working with modern development tools and frameworks, and he consistently delivered clean, maintainable, and efficient code.

Beyond his technical abilities, Yacine proved to be a reliable and collaborative team member. He communicated effectively, asked thoughtful questions, and demonstrated a genuine eagerness to learn and improve. He is a happy individual, always excited for what's next!

Yacine's work ethic, attention to detail, and willingness to take initiative distinguish him as a promising machine learning developer. I am confident that he will bring value to any organization he joins.

I highly recommend Yacine Bouzerara for future opportunities and wish him continued success in his professional career.

Sincerely,

Representative of the company: Alexandra Xanthopoulou

Title: Chief of Operations
